

0790 D-LP SATPOINT

LOW PRESSURE FOAM, RINSE & SANITISE SATELLITE STATION

The 0790 D-LP SatPoint is a heavy-duty stainless steel satellite station designed for low-pressure washdown systems operating between 3 and 10 bar. Operators can easily select rinse water, foam solution or disinfectant through a single hose and gun. The unit features an orifice plate dosing system, stainless steel injector, compressed air regulator and non-return valves mounted on a stainless steel back plate.

Code

0790 D-LP SatPoint

0790

KEY FEATURES & BENEFITS

- Provides rinse, foam and sanitising functions from a single station
- Designed for low-pressure washdown systems
- Heavy-duty stainless steel construction for durability
- Simple operator selection between cleaning media
- Includes dosing nozzles for adjustable chemical concentration
- Complete assembly mounted on a stainless steel back plate

TECHNICAL DETAILS

Inlet Pressure Range	3 - 10 Bar
Maximum Temperature	70°C
Rinse Flow Rate	10 - 30 L/min
Maximum Foam Flow Rate	7 - 8 L/min
Air Inlet	1/4"
Air Consumption	150 L/min
Dosage Range	1 - 6%
Weight	6 kg
