

# BLUE FLEXI LANCE

## 0290

The Blue Flexi Lance is a flexible stainless steel lance designed to provide access to previously inaccessible areas during washdown operations. Capable of bending up to 90°, it allows operators to clean difficult-to-reach corners while reducing strain and improving cleaning efficiency. Foodclean can supply the lance to suit specific system requirements, including configurations fitted with wash guns, couplings, nozzles and other accessories.

### KEY FEATURES & BENEFITS

- Bends up to 90° for improved access to hard-to-reach areas
- Enables efficient cleaning of corners and restricted spaces
- Lightweight and flexible construction helps reduce operator fatigue
- Reduces bacterial risk by improving access to difficult cleaning areas
- Maintains flexibility and strength in cold environments
- Suitable for use with all system types

### TECHNICAL DETAILS

|                     |            |
|---------------------|------------|
| Length              | 600mm      |
| Maximum Temperature | 90°C       |
| Maximum Pressure    | 175 Bar    |
| Weight              | 600g       |
| Inlet Connection    | 1/4" M BSP |
| Outlet Connection   | 1/4" F BSP |
