

DRUM TOP FOGGER

0730

The Drum Top Fogger is a portable fogging device designed to deliver consistent fog quality for sanitising and disinfection applications. Simple to operate, it requires only a compressed air supply and a 25L drum of pre-diluted chemical, making it suitable for flexible use across multiple locations.

Product	Code
Drum Top Fogger	0730

KEY FEATURES & BENEFITS

- Provides consistent fog generation for effective application
- Portable and lightweight design for easy handling
- Flexible operation across different work areas
- No moving parts for simplified maintenance and reliability
- Robust stainless steel nozzle construction

TECHNICAL DETAILS

Compressed Air Requirement	4 - 6 Bar
Air Flow Input Required	250 - 300 L/min
Fog Output (Approx.)	1 L/min
Particle Size	<1 - 100 Micron
Recommended Room Size	Up to 5m Ceiling Height
Material	Stainless Steel / PE
Chemical Supply	25L Drum of Pre-Diluted Chemical
