

FOAM LANCE WITH BOTTLE

0316

KEY FEATURES & BENEFITS

- Produces a consistent foam mixture for effective cleaning performance
- Fully stainless steel injection unit provides excellent corrosion resistance
- High chemical resistance for demanding cleaning applications
- Defined dosing positions allow controlled chemical application
- Adjustable for horizontal or vertical spray patterns

The Foodclean Foam Lance with Bottle is designed to create an ideal mixture of air and cleaning chemical, producing consistent, high-quality foam for cleaning applications. The unit features a fully stainless steel, non-corrosive injection system with high chemical resistance and can be used with either horizontal or vertical spray patterns.
