

# HD TWIST GRIP NOZZLE

0178 | 0124

## KEY FEATURES & BENEFITS

- Twist grip design allows quick adjustment of spray angle
- Lightweight construction for easy handling and reduced operator fatigue
- Durable rubber outer body provides improved grip and stability
- Available in multiple colour options for easy identification
- Robust construction suitable for demanding industrial environments

The HD Twist Grip Nozzle is an extremely durable nozzle designed for low and medium pressure systems. Featuring a rotating grip that allows the spray angle to be adjusted during operation, it combines robust brass and rubber construction with efficient handling for demanding cleaning applications.
