

HOT WATER HEAVY DUTY WASH GUN

A robust wash gun designed for use with high-temperature water applications. The gun features a front trigger guard and durable rubber cover to provide operator protection and long service life.

A controllable water jet allows the spray pattern to be adjusted between a fan spray and a straight jet to suit different cleaning requirements.

KEY FEATURES & BENEFITS

- Rear trigger provides precise control during operation
- Available in brass or stainless steel versions
- Choice of standard-flow and high-flow configurations
- Replacement covers available for extended product life
- Suitable for a wide range of washdown applications

TECHNICAL DETAILS
