

PVC BRAIDED REINFORCED HOSE

LOW PRESSURE AIR, WATER & FLUID HANDLING HOSE

KEY FEATURES & BENEFITS

- Excellent resistance to alkalis and acids for demanding cleaning applications
- Lightweight, highly flexible design for easy handling and installation
- Superior abrasion resistance for extended service life
- Resistant to cracking and splitting caused by UV exposure and prolonged sunlight
- Suitable for compressed air, water, dilute chemicals and general fluid handling
- Manufactured in compliance with BS6066, ISO 5774 and FDA requirements

The Foodclean PVC Braided Reinforced Hose is designed for low-pressure air supply, water supply and drainage applications. Manufactured for hygiene-critical environments, it offers excellent resistance to alkalis, acids, UV exposure and abrasion, making it a durable and flexible solution for food and beverage processing.

TECHNICAL DETAILS

Bore Dimension	1/4"
Maximum Pressure	15 Bar
Minimum Temperature	-20°C
Maximum Temperature	65°C
Minimum Bend Radius	25mm
