

REVOLVING TURBO NOZZLE RANGE

0300 | 0305 | 0329 | 0330 | 0331

KEY FEATURES & BENEFITS

- Reduces cleaning time through high-impact rotating spray action
- Cleans a wider surface area more effectively than standard nozzles
- Helps reduce water consumption by allowing smaller nozzle sizes to be used
- Compatible with most standard 1/4" lances
- Repair kits available for extended service life

The Revolving Turbo Nozzle automatically spins a zero-degree spray pattern in a 4–8 inch circle at approximately 3,000 rotations per minute. The rotating water jet impacts surfaces from multiple angles, delivering more effective cleaning over a wider area than a standard nozzle while enabling the use of a smaller nozzle size to help reduce water consumption.

Product

Code

045 Revolving Turbo Nozzle (1/8" Male Thread)	0300
05 Revolving Turbo Nozzle (1/4" Female Thread)	0305
06 Revolving Turbo Nozzle (1/4" Female Thread)	0329
07 Revolving Turbo Nozzle (1/4" Female Thread)	0330
08 Revolving Turbo Nozzle (1/4" Female Thread)	0331
Turbo Nozzle Repair Kit	0333

TECHNICAL DETAILS

Construction	Brass main body with black plastic shroud
Connection Type	1/8" or 1/4" male or female thread
Maximum Temperature	100°C
Pressure Rating	100–250 Bar
Spray Pattern	Zero-degree rotating jet
Rotation Speed	Approx. 3,000 rpm
Cleaning Coverage	4–8 inch circular pattern
