

SPRING TOOL BALANCER

FOR NITA TRACKING SYSTEMS (4-6KG)

KEY FEATURES & BENEFITS

- Rugged cast aluminium body for long-lasting durability
- Stainless steel rope for reliable performance and corrosion resistance
- Adjustable load capacity to suit different tool weights
- Auxiliary safety suspension for enhanced operational safety
- Integrated safety device helps prevent load dropping in the event of spring failure
- Adjustable stroke limiting device for greater application flexibility
- Anti-friction cable guide promotes smooth cable movement and reduced wear
- Inert spring drum assembly for consistent, reliable operation
- Durable polyamide thimble for extended service life

The Foodclean Spring Tool Balancer is designed for use with NITA® Tracking Systems, providing smooth and controlled support for tools weighing between 4 and 6kg. Its rugged construction, integrated safety features and adjustable settings help improve operator comfort, enhance workplace safety and support efficient tool handling in demanding industrial environments.
