

TECHNIJEKTOR LARGE FLOW

VENTURI FOR FILLING

KEY FEATURES & BENEFITS

- High flow performance for fast dilution and filling
- Suitable for filling foamers, foggers, sanitiser units and containers
- Compatible with chlorinated chemicals
- Available in red or blue versions
- Designed for demanding food industry environments
- Interchangeable dilution plates provide flexible dosing options

Product	Blue	Red
Technijektor Large Flow Venturi for Filling	0835	0847

Dilution Rate	Code
0.5%	071205
1.0%	07121-1
1.5%	071215
2.0%	07122-2
2.5%	071225
2.7%	0712-37
3.0%	07123-3
4.0%	07124-4
5.0%	07125-5
6.0%	0712-57
6.5%	07126
10%	0712-75
Dilution Plate Kit (1%, 1.5%, 2%, 3%, 4%, 5%, 6%)	0712

The Technijektor Large Flow Venturi is designed for rapid chemical dilution and filling applications. Drawing chemical directly from a drum or bucket, it doses concentrate into the water supply for filling tank foamers, buckets, foggers and sanitiser units. Chemical concentration is controlled using interchangeable orifice dilution plates to suit individual application requirements.

TECHNICAL DETAILS

Pressure Rating	3 - 20 Bar
Flow Rate	24 - 61 L/min
Inlet Connection	3/4" QR Nito Coupling
Injector Body Material	316 Stainless Steel
Pick-Up Hose Length	1.5m
Filler Hose Length	2m
Chemical Dosing Range	0.5% - 6.5% & 10%

*Dilution Plates supplied separately.
