

TECHNICAL DATA SHEET

GENERAL DESCRIPTION

ACIFILM™ is a specially formulated thick gel type product which is a heavy duty acid product designed for the Food, Dairy and Beverage industries, which clings exceptionally well to vertical services.

ACIFILM™ provides unbeatable contact times due to its ability to form a viscous film on the application surface.

Applications include: removal of heavy deposits of hard water scale, beer and milk stone, rust, oxalates and protein deposits.

Difficult to remove residues containing compound soils such as heavy protein/scale build up.

TYPICAL PROPERTIES

Clear pale yellow liquid

Specific gravity @20°C - 1,15 aprox

APPLICATION

ACIFILM™ can be applied neat via brushing or a 50%v/v solution can be foam applied using suitable foam generating equipment.

Leave in contact for 20-30 minutes, before rinsing off with clean water.

MANUAL APPLICATION: Can be applied neat (i.e. painted on) removable items may be soaked in a 10-50%v/v solution.

STORAGE

Do not allow to freeze and store away from heat.

Store in original shipping container away from chlorinated products.
